## LABORATORY REPORT - HEMATOLOGY & CHEMISTRY

|               |                                    |              |                     |
|---------------|------------------------------------|--------------|---------------------|
| Patient Name: | Jordan A. Rivera                   | Accession #: | BV26-027781         |
| DOB / Age:    | 1991-03-22 (34 yrs)                | Collected:   | 2026-02-09          |
| Sex:          | Female                             | Reported:    | 2026-02-10          |
| MRN:          | BV-0498217                         | Specimen:    | Whole blood / Serum |
| Provider:     | Henry Cole, MD - Internal Medicine | Status:      | FINAL               |

| TEST                       | RESULT | FLAG | REFERENCE RANGE | UNITS               |
|----------------------------|--------|------|-----------------|---------------------|
| COMPLETE BLOOD COUNT (CBC) |        |      |                 |                     |
| WBC                        | 6.4    |      | 4.0 - 11.0      | 10 <sup>3</sup> /uL |
| RBC                        | 4.08   | L    | 4.20 - 5.40     | 10 <sup>6</sup> /uL |
| Hemoglobin                 | 11.6   | L    | 12.0 - 15.5     | g/dL                |
| Hematocrit                 | 34.8   | L    | 36.0 - 46.0     | %                   |
| MCV                        | 78     | L    | 80 - 100        | fL                  |
| MCH                        | 25.3   | L    | 27.0 - 33.0     | pg                  |
| MCHC                       | 32.6   |      | 32.0 - 36.0     | g/dL                |
| RDW                        | 15.9   | H    | 11.5 - 14.5     | %                   |
| Platelets                  | 364    |      | 150 - 400       | 10 <sup>3</sup> /uL |
| IRON STUDIES               |        |      |                 |                     |
| Serum Iron                 | 41     | L    | 50 - 170        | ug/dL               |
| TIBC                       | 398    |      | 250 - 450       | ug/dL               |
| Transferrin Sat.           | 10     | L    | 20 - 50         | %                   |
| Ferritin                   | 27     | L    | 30 - 400        | ng/mL               |
| VITAMINS                   |        |      |                 |                     |
| Vitamin B12                | 287    |      | 200 - 900       | pg/mL               |
| Folate, Serum              | 7.9    |      | 3.0 - 20.0      | ng/mL               |

### COMMENTS

Low ferritin with microcytic indices noted. Suggest oral iron supplementation and follow-up iron studies; correlate clinically.
